

DEVELOPMENT SAMPLE VEHICLE INSURANCE POLICY

Clean policy document for academic development and RAG testing only — not a real insurance contract

IMPORTANT: DemoShield General Insurance Ltd. is a fictional insurer created for the Insurance Claim Support AI Agent project. This document must not be used for real insurance, legal, financial, or claim decisions.

1. Policy Schedule

Field	Details
Insurer	DemoShield General Insurance Ltd. (Fictional)
Policy ID	DEV-AUTO-000001
Policyholder	Anitha Sample (Development Data)
Vehicle Type	Private Car
Vehicle Registration	TN-00-DEMO-0001
Vehicle Make / Model	Demo Motors Secure Sedan
Policy Type	Comprehensive / Package Policy
Policy Start Date	01 January 2026, 00:00
Policy End Date	31 December 2026, 23:59
Geographical Area	India (development assumption)
Insured Declared Value	■6,00,000
Compulsory Deductible	■2,000 per own-damage claim

2. Covered Events

- Accidental collision with another vehicle.
- Accidental impact with a fixed object, such as a wall, pole, or barrier.
- Fire, explosion, or self-ignition, subject to exclusions.
- Theft of the insured vehicle, subject to policy conditions and required documentation.
- Natural events such as flood, storm, cyclone, lightning, and earthquake, subject to exclusions.
- Man-made events such as riot, strike, malicious damage, and vandalism, subject to exclusions.
- Transit by road, rail, inland waterway, lift, or elevator, where applicable and documented.

3. Own-Damage Coverage

The policy may pay for reasonable repair or replacement costs arising from a covered event, up to the applicable limit and after deducting the compulsory deductible, depreciation, salvage value, and any other applicable deductions. The insurer may choose repair, replacement, cash settlement, or another settlement method permitted by the policy terms.

4. Third-Party Liability

The policy provides third-party liability protection for legally recoverable bodily injury, death, or property damage caused by the insured vehicle, subject to applicable law, policy limits, exclusions, and required reporting. This clause does not automatically mean that damage to the policyholder's own vehicle is covered under a third-party-only policy.

5. Major Exclusions

- Driving without a valid driving licence or required authorization.
- Use of the vehicle for racing, speed testing, or other prohibited activities.
- Use of the vehicle outside the permitted purpose declared in the policy.
- Damage caused intentionally by the policyholder or with the policyholder's involvement.
- Normal wear and tear, mechanical or electrical breakdown not caused by a covered accident.
- Damage occurring outside the policy period.
- Loss arising from war, nuclear risk, or other specifically excluded events.
- Fraudulent, false, or materially incomplete claim information.
- Consequential loss unless specifically included by an endorsement.

6. Claim Conditions

- The policyholder must notify the insurer as soon as reasonably possible after an incident.
- The policyholder must provide accurate incident details, photographs, repair estimates, and supporting documents.
- The policyholder must cooperate with inspection, verification, investigation, and document requests.
- The vehicle should not be repaired or disposed of in a way that prevents reasonable inspection, except where necessary for safety.
- A police report or other official record may be required for theft, major accidents, third-party injury, or other specified incidents.
- The insurer may reject or reduce a claim where a policy condition, exclusion, or legal requirement applies.

7. Policy Interpretation and Human Review

Coverage is subject to the complete policy terms, applicable endorsements, policy schedule, deductibles, exclusions, evidence, and applicable law. Retrieval of a clause does not by itself establish that a claim is payable. The AI system should provide supporting evidence and a recommendation for review by authorized insurance personnel. Final claim decisions must not be made solely by the AI agent.

8. Document Classification for RAG

Document type: insurance_policy

Policy ID: DEV-AUTO-000001

Source type: fictional_development_policy

Authority status: development_reference_only

Recommended use: policy retrieval, clause grounding, and controlled testing

End of clean development sample policy — DEV-AUTO-000001
